RE: Frank Linder

Dear Sir:

Mr. Linder has requested that I write a letter detailing his medical illness.

Mr. Linder is a gentleman who presented initially back in 3/00 with a cancer arising from the distal esophagus/proximal stomach. He underwent surgical excision of the tumor at that point. He was found to have involved paraesophageal nodes and subsequently underwent radiation therapy and chemotherapy. He did well for a period of time, but unfortunately in 12/00 was found to have metastatic disease to his left humerus. He has received radiation therapy for this and some additional procedures to assist in control of pain. The patient unfortunately has recently progressed both in the left shoulder and also now in the right posterior ribs.

Mr. Linder has metastatic cancer of the gastroesophageal junction to bone. This is a terminal condition. Any consideration that you can give him would be greatly appreciated.

Sincerely,

Joseph J. Bowen, M.D.

JJB/scc
